Highly Cited Research

This resource captures the people behind the most influential publications in 21 broad subject categories based on citation metrics. Learn more about the methodology. List your current affiliation in ResearcherID to ensure your most current information is reflected in Highly Cited Research.

What is ResearcherID?

ResearcherID provides a solution to the author ambiguity problem by providing a unique identifier to enable researchers to manage their profiles, identify collaborators and avoid author misidentification. In a world that is becoming increasingly ORCID compliant, allowing you to claim and showcase your work, identify collaborators, review publication lists and explore how your work is being used.

As a registered member, you can:

- Manage your publication list and showcase your work
- Track your times cited count and h-index
- Identify potential global collaborators
- Avoid the common problem of author misidentification

Because ResearcherID integrates with Web of Science* and EndNote online, your publications will then automatically be updated within Web of Science, making a research environment that is relied upon by more than 20 million researchers around the world.

Additionally, you can associate your ResearcherID account with your ORCID account.

If you have any questions about the registration process, please contact the Thomson Reuters IP & Science Global Support team (<http://ip-science.thomsonreuters.com/support/>). Please note that the sending email address cannot accept replies.

* Although ResearcherID.com is accessible from any computer, features integrated with Web of Science require you to be on an authenticated computer.

Kind Regards,
The ResearcherID Team

Publons

With Publons you can be recognised for your peer review efforts alongside your publications.

- I would like to create a Publons account.
- I already have a Publons account.
- No, thank you.

Publons helps you to record, verify and showcase your peer review contributions for use in your peer review without compromising reviewer anonymity or infringing upon journal policies. You can use the service at any time.

Once you have created an account on Publons you will be able to link it to your ResearcherID.

Add Publications

Use this list to display all the publications that you have authored.

Adding Publications to this list

You can add publications by searching *Web of Science™*, searching *Web of Science™ Core Collection*, using *EndNote™*, or uploading a file. To add publications, click the **Add** link located in the menu on the left-hand side of your screen, or by clicking on the **Add Publications** above.

* Note: Access to *Web of Science* and *Web of Science Core Collection* are based on the entitlements of the computer where you are accessing ResearcherID.

Please remember to only add publications that you have authored to this list. This list will be used by *Web of Science Core Collection* to create a Distinct Author Set, which is a set of papers that will be associated with your name, and your ResearcherID number will be displayed on the *Web of Science Core Collection* record. This allows *Web of Science Core Collection* users who find one of your papers on this list to find all of the other papers on this list.

Making the list public or private

You have the ability to make your "My Publications" public or private. If public, then visitors of ResearcherID can see your scholarly output, and your list will be sent to the *Web of Science* (click here for more information). Click on the **Manage Profile** button at the top-right corner of the page and select the Publication Lists tab to change the privacy settings of your data.

To add publications to your Publication List, select one of the options below by clicking a link.

Note: Depending on your permission to access *Web of Science™* and *Web of Science™ Core Collection*, you will have different options available.

Option 1:

WEB OF SCIENCE™

[Search Web of Science](#)

Use this option to search *Web of Science*. Depending on your subscription, this can include articles, books, patents, and more.

[Search Web of Science Core Collection](#)

Use this option to search *Web of Science Core Collection*. Depending on your subscription, this includes the world's leading scholarly literature in the sciences, social sciences, arts, and humanities and proceedings of international conferences, symposia, seminars, colloquia, workshops, and conventions.

Option 2:

ENDNOTE™

[Go to EndNote](#)

Use your EndNote account to add articles and manage your ResearcherID publication lists.

Already use EndNote? You can transfer your ResearcherID publication lists between the desktop and web effortlessly. Learn about the additional features available in EndNote to accelerate your research including find full text automatically and access to over 3,700 publishing styles.
